NEW!

A.I Kit for High Security Insemination

Includes:

- 150 Alpha™ sheaths
- 1 Kombicolor A.I gun
- 2 rolls of 80 sanitary sheaths
- 2 boxes of sensitive copolymer long gloves

The best tool for do-it-yourself A.I., the PolyBox is made of durable extruded non-porous cellular plastic which will keep it clean.

The best tools for bovine A.I now safely protected and fully portable.

Includes:

■ Alpha™ sheath Better insemination

Animal well-being: fitted with a polished, round and crystalline head, an ultra-smooth body, Alpha™ is easier to work with. The handling of the cervix is effortless with cows or heifers without any possibility of causing tissue lesions.

Better Breeding: no backflow thanks to a better fit with either Mini or Medium straws. Its dual lateral delivery design ensures that the insemination takes place regardless of placement, with improved hygiene.

Traceability: the clear crystalline body and head allow you to read information printed on straws. Possibility to read the barcode through the sheath.

Time saving: insert placed at the end of the sheath. Palpable dome design to facilitate proper placement of semen.

■ Kombicolor

Inseminate 4 cm deeper than other guns

Fast connection and easy removal of the sheath

Quick identification with 5 different colored rings

Universal, mini and medium straws

Non-magnetic, austenitic 304L 18/10 stainless steel for years of use

Easy to clean for improved hygiene

■ **2 rolls of 80 sanitary sheaths to prevent the spread of diseases.**

■ **2 boxes of 100 gloves**
Extra long – 100 cm – 40" copolymer gloves with detachable strip. While strong, these top-of-the-line gloves have an extraordinary silky feel.

■ **Dry erase surface on the box's inner flap for important notes or cow identification.**
